Dear partners in the winter sports industry,

We are delighted to present our latest teamwear collection, which represents a perfect symbiosis of our refined brand DNA and the special requirements of ski schools and ski clubs. Schöffel has always stood for the highest quality, functionality and the **Ich bin raus.** passion. Our teamwear embodies these values in a special way and brings them directly to the slopes.

The Schöffel winter collection 2025 sets new standards in terms of material innovation and fit. For example, Primaloft® padding and StayFresh™ Polygiene technology offer maximum comfort. This collection was developed specifically for the different needs of ski schools and ski clubs to ensure that every challenge on the mountain can be mastered. We are also particularly proud of our expertise in fit and size diversity. Whether oversized, long or short sizes - our teamwear is tailored to the individual requirements of the wearer to ensure a perfect fit.

Teamwear plays a decisive role for the Schöffel brand. We make teamwear because we are convinced that ski schools and ski clubs are an important key to giving people access to winter sports. Ski instructors are the experts who are out in the snow every day, teaching people the joy of skiing and passing on their knowledge. They are the role models who inspire others to venture out and enjoy the freedom on the mountain. Our clothing supports them every day with maximum functionality and comfort.

Schöffel is looking forward to shaping winter 2025 together with you.

Sincerely
Stefan Merkt

A selection of our partners:

“ As a high alpine snow sports area (up to 3'500 m above sea level) we are dependent on high quality and functional outdoor clothing. In Schöffel we have a partner that covers all our needs. Our employees appreciate the **comfort, the stylish design and the unique quality**. Further plus points are **the reliability and the fabulous customer service**.

Sandro Bumann, Head of HR / Saastal Bergbahnen in Saas-Fee

“ For more than 5 years we have been using the **high quality clothing** from Schöffel for our employees in the mountains. We appreciate the partnership, the short communication channels with Schöffel and the **implementation of our wishes**.

Marco Leu, CFO / Deputy CEO Titlis, Mountain Railways, Hotels & Gastronomy

“ With Schöffel as a loyal and reliable partner at our side, we are perfectly equipped for all situations. Whether it's +10 or -30 degrees, the clothing offers a high level of comfort and functionality in all temperatures. From light base layers to midlayers and protective outer jackets, we are equipped for all weather conditions. The collection is perfectly coordinated with the matching colors and sophisticated design. This means we are easily recognizable as a team and can present a uniform appearance

Roland Assinger, Cheftrainer Ski Alpin

“ For me, ski clothing has to be warm, comfortable and functional, and Schöffel definitely has all of that. With the coordinated color combinations and the layering system, we are always perfectly dressed in different weather conditions. My favorite piece is definitely the Down Coat, which I wear almost every day in winter and never gets cold.

Cornelia Hütter, Nationalmannschaft Damen Ski Alpin

THE ULTIMATE SHOWDOWN

FIS SNOWBOARD | FREESTYLE | FREESKI
 WORLD CHAMPIONSHIPS
 ST.MORITZ ENGADIN 2025

Tested by the best

Since 2018, Schöffel has been the proud supplier of the sports aerials, moguls and skicross from Swiss-Ski.

Thanks to the lively dialogue with the athletes and coaches, our teamwear collection can be continuously developed and improved. We are very much looking forward to continuing the collaboration and the excellent dialogue, and we would like to thank Swiss-Ski for the excellent partnership and wish our athletes a successful, injury-free 2024/2025 season and good luck and lots of medals at the season's highlight, the Freestyle World Championships in St. Moritz.

„Our partnership with Schöffel is based on trust and a shared passion for winter sports. Schöffel has been an extremely committed and reliable partner for many years and, thanks to its proximity to the sports of skicross, aerials and moguls, understands the needs of our athletes perfectly and equips them optimally with high-quality products. We are proud to have such a strong partner at our side and look forward to continuing our collaboration.“

Silvan Nideröst,
Managing Director Swiss Ski Pool &
Head of Equipment Swiss-Ski

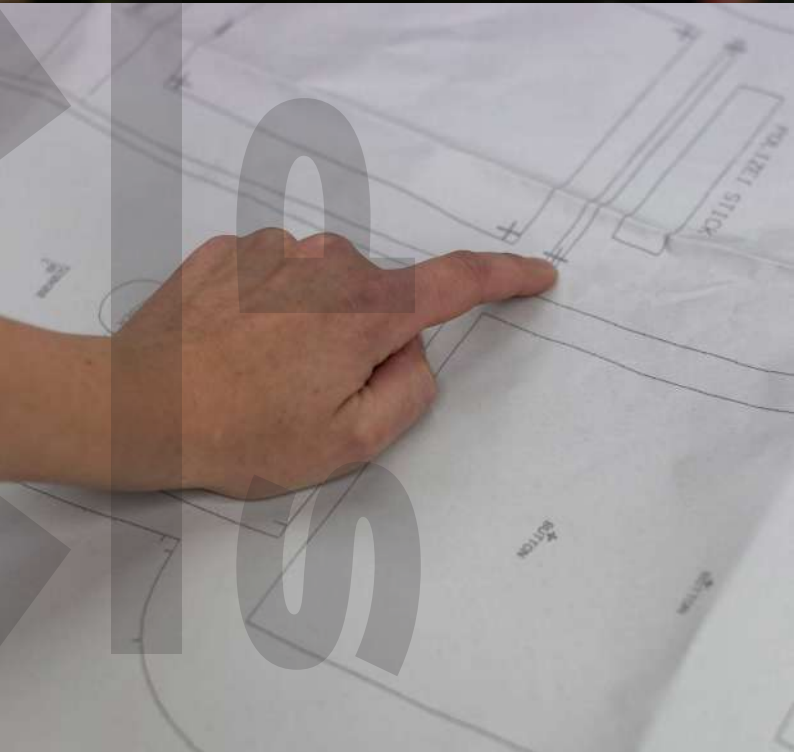

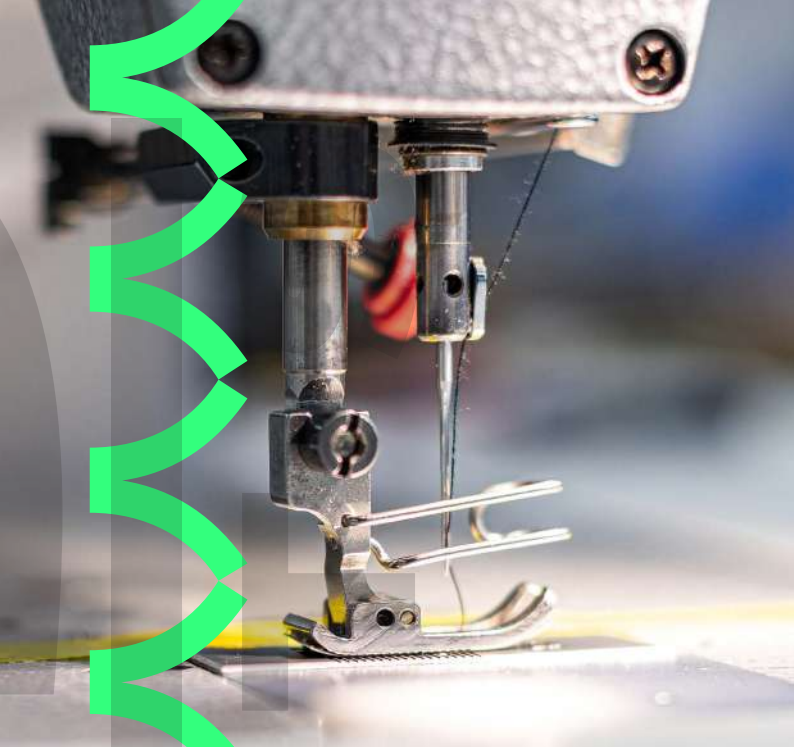

Perfect fit
for each team

Schöffel knows what's important: teamwear should be as versatile as the people who wear it. With our teamwear, we set standards in terms of fit and size variety. Whether short or long sizes, slim or sturdy builds: we offer a wide range of sizes. Equipped for top performance - to fit every body.

Our cuts are precisely tailored to the needs of skiing and offer maximum comfort, freedom of movement and functionality - developed to fulfil the highest demands. Because we know: Good teamwear promotes top performance by combining maximum comfort and functionality. With Schöffel teamwear, everything fits perfectly - from the first training session to the big competition. For us, freedom means that every team member wears clothing that fits and inspires. Schöffel - for everyone who lives fit and performance together.

The Schöffel Service Factory

The Schöffel Service Factory has existed in its current form since 2018, but our repair service has existed since 1961. What was once based on the Swabian idea of repairing rather than replacing is now characterised by sustainability. In Schwabmünchen, 15 experienced tailors tailors with passion and original original materials to professionally repair your equipment - for long-lasting fun with your favourite pieces.

Of course, we also offer our professional repair service for your teamwear products. Send in your Schöffel teamwear cleaned for repair during the summer break so that it is ready for the new season. Products that reach us by 31 May at the latest, are guaranteed to be ready for the start of the season. Remember to fill in an accompanying card for each product - that way we know exactly which repairs are required. Extend the life of your equipment with the professional service of the Schöffel Service Factory!

Sustainability is not a hobby. It is a way of life and a question of attitude.

The Schöffel family business always has one thing in mind: people and the environment. The corporate responsibility strategy (CR strategy) is also based on this. This involves continuously evaluating the impact of our actions in every area and asking ourselves: Where can we make the biggest difference? And even if Schöffel, as a medium-sized company, often comes up against limits, we always endeavour to expand these in the interests of people and nature. That is why Schöffel consciously focusses on two key areas: social and ecological value creation. Schöffel aims to achieve responsible production of textiles in its manufacturing facilities and endeavours to continuously promote and develop a sustainable corporate culture and cooperation at its own company location.

Four focal points were again chosen for ecological value creation:

- Reducing our own CO2 emissions by 50% by 2030
- Promoting the circular economy through circularity models
- long-lasting products thanks to high quality and our in-house Service Factory
- Holistic chemicals and pollutant management

Schöffel's mission is to provide people with many unique and moving outdoor experiences. This includes acting sustainably and socially.

This is an absolute prerequisite for us in order to guarantee a confident and relaxed *Ich bin raus-*feeling in every situation. So: Be relaxed and experience nature in a self-determined and unconstrained way - together with Schöffel.

Height			185–191	186–194	187–195	188–196				
Hips			96–100	100–104	104–108	108–113				
Inside leg			83–87	84–90	85–89	86–90				

THE RIGHT WAY TO MEASURE YOUR SIZE

It's best to wear just your underwear and no shoes. The measuring tape should be placed loosely around the body and not pulled tight. If possible, ask someone else to help you take the measurements.

Where to measure: See the diagrams on the right

1. CHEST:

Measure the widest part of the chest just under the arms. Let your arms hang loosely by your side.

2. WAIST:

Measure the narrowest part of your waist.

3. HIPS:

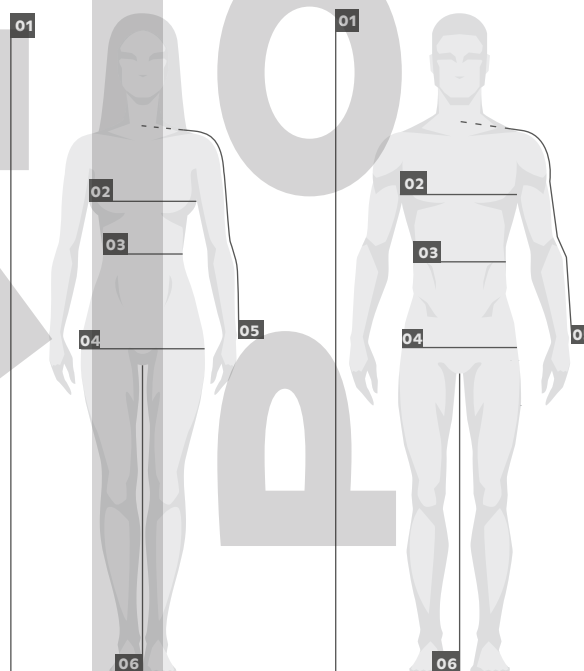

Measure the widest part of your hips and seat.

4. INSIDE LEG:

Measure the inside of the leg from the crotch to the sole of the foot.

5. SLEEVE LENGTH

Measure from the centre of your back to the wrist. The arms should be slightly angled.

01 | Height
02 | Chest
03 | Waist

04 | Hips
05 | Sleeve length
06 | Inside leg

TECHNICAL TERMS

Breathability:

Breathability is the term for moisture transport and thus stands for the water vapor permeability of a material from the inside to the outside.

- The MVTR value (moisture vapour transmission rate) gives which amount of water can be passed through one square meter of water in 24 hours Substance evaporates (measured in grams). The higher the value, the higher the breathability (very good value > 10.000 g/m²/24h).

Coating:

Thin film of synthetic material, which on the inside of the outer fabric is applied to a garment to create a wind and waterproof. Alternative to the Production processes with membranes.

Bonding:

Bonding of textile surfaces without a weaving or knitting process. Use e.g. for soft-shell jackets without membrane.

DERMIZAX®:

meets the highest standards of wind and water protection. At the same time, a particularly fast one takes place, dynamic moisture transport. Furthermore the membrane highly elastic, resulting in maximum wearing comfort especially for waterproof garments.

Elastane (EL):

Very stretchy, synthetic fibers, mainly made of polyurethane. Very thin and light resistant, but heat sensitive (max. 45°!). Is usually used together processed with other materials.

Impregnation:

- a) Water repellent finish: Provides dirt and water repellent properties of a garment and is standard at Schöffel applied to the textile ex works. Impregnated only the outer fabric is used, to enhance the function of the membrane support.
- b) Post-impregnation: With a suitable impregnation spray, the water-repellent equipment can be reactivated.

Isolation:

Indicates how much body heat a textile can store.

Insulation layer:

Should store body heat and prevent cooling.

Light fastness:

With the help of artificial Light with high UV radiation and a certain humidity the fabrics are irradiated, in order to prevent their fading under Influence of solar radiation.

PrimaLoft® Black Eco:

PrimaLoft® Black Eco is based on the general conditions of the base material PrimaLoft®. However, it has the peculiarity that it is a post-consumer material (PCR) is.

This means that it is produced from waste materials, which are caused by the use and consumption of plastic products occur. The fibers of this environmentally friendly product variant are 100% recycled. Despite the more ecological Background supplies the reprocessed modification in combination with advanced fiber technology optimal and consistent functionality.

Membrane:

Thin films made of synthetic materials, which are integrated into the textile can be incorporated. Goal: Wind and water resistance of a garment and at the same time Ensures high breathability.

PFC-free:

Avoidance of the use of environmentally harmful per- and polyfluorinated chemicals (PFC) in the production process.

Pilling:

Superficial formation of nodular fiber balls of textiles.

Abrasion resistance:

Abrasion resistance is the resistance of the textile against abrasion under certain conditions, which are Change of the fabric appearance or significant properties of the textile is assessed.

Water repellent:

Water repellency: A water-repellent Effect of Textiles are achieved by hydrophobic finishing. The surface is changed in such a way that it is not affected by water is wetted.

Water column:

The water column describes a process to determine the resistance to penetration of water, Hydrostatic pressure test. Evenly distributed over the pattern at 5 points the Waterproofness is measured, the test specimen is Pressure of a pressure increasing at a steady rate water column exposed.

ORDER PROCESS

1. CONTACT

Your regional representative (see Contact page) will work with you to find a suitable Schöffel retailer and will organise an initial appointment for you with your Schöffel retailer.

2. REQUIRED MODEL

Tell your regional representative which model you require.

ORDER DEADLINE
31.03.2025

3. FITTING APPOINTMENT

Arrange a fitting appointment with your regional representative. (The samples are identical in size and fit with the models you have selected).

4. PLACE YOUR ORDER

Submit your completed order to your Schöffel retailer by the deadline stated above.

Please note: Once your order has been received, it will no longer be possible to make any changes.

5. ORDER CONFIRMATION

Once the order has been processed in full, you will receive an order confirmation from us and a colour overview of the goods you have ordered.

6. SUPPLY

From Schöffel:
November 2025

Limitation of liability for multi-year contracts (regulatory changes in the area of harmful substances):
"Should it no longer be possible to meet contractually agreed quality parameters due to changes in the law, such as an extension of the list of prohibited and restricted substances in Annex XVII of the REACH regulation (EC) 1907/2006 or a tightening of the current requirements of the POP regulation (EC) No. 850/2004, liability or other claims against Schöffel by the contractual partner are excluded. Schöffel is not liable for any delays in delivery. If delivery is no longer possible due to the change in the law or involves unreasonable effort, Schöffel may withdraw from the contract. No claims for damages shall arise from this. Should the change in the law necessitate a change in production resulting in higher costs, the parties shall renegotiate the prices. Should the parties fail to come to an agreement, both parties shall have the right to withdraw from the contract."
