**WHEN
PERFECTION
BECOMES
OBSESSION
MAGICAL
THINGS
ARISE**

MARCEL HIRSCHER'S STORY IS ONE-OF A-KIND.

Competing at the highest level for 15 years, he profoundly changed the world of ski racing by setting new standards with his exceptional talent, technical skills, race intelligence, training methods, and physical fitness. What really set him apart from everybody else, though, was his professional, no-compromise approach to his equipment.

Marcel's obsession for tinkering and fiddling with things and his perfectionism often drove people mad. But his ability to translate his intuition and extraordinary feeling for both snow and gear into innovation have made him one of the most successful alpine skiers of all time.

The fact that Marcel has achieved everything there is to achieve in alpine skiing is also a result of his long-standing partnership with Red Bull. And so it comes as no surprise that this collaboration has created a common vision. Being an innovative ski manufacturer, VAN DEER-Red Bull Sports is ushering in a new era to take skiing to the next level - with pooled knowledge, an uncompromising winning spirit and drive for perfection. Not just on the racecourse, but also in Marcel's new favorite playgrounds: backcountry and big mountain.

SKIS**

Nobody is born a World Cup winner. Not even a living legend like Marcel Hirscher, who has won everything there is to win in alpine ski racing, including a record 8 consecutive World Cup titles, 67 World Cup races, 20 crystal trophies, and 14 medals at major events. When you are a young, aspiring ski racer you will find that it takes a lot of hard work, commitment, luck, sweat, and sometimes tears to make it to the top. It also requires a great deal of support from your coaches, family, and friends. And: some kick-ass equipment. That's where we come in. We want to give you a unique competitive advantage, so we build our Junior Race skis in the same way as our "grown-up" World Cup skis, with the exact same world-class materials and Race Room finish. With us, you don't get B-grades just because you haven't reached the age limit and need a shorter ski length. Of course, our SL-JR and GS-JR skis meet all FIS regulations, and they have been developed and approved by Marcel Hirscher.

SL-JR RACE SKIS

The SL-JR PRO is a premium no-compromise Junior Race ski developed and approved by Marcel Hirscher. Complying with current FIS regulations, it's a replica of our SL World Cup skis, built and tuned with the exact same state-of-the-art technology, know-how, materials, and attention to detail. At 132 cm it is simply shorter - ideal for up-and-coming U14 and U16 racers, who take their skiing just as seriously as the world elite. Delivering explosive power out of Slalom turns, quick edge-to-edge agility, great edge grip and stability the SL-JR PRO will take you through the Slalom gates as fast as possible. And onto the top of the podium. Ready to follow Marcel's footsteps?

GS-JR RACE SKIS

Developed and approved by none less than Marcel Hirscher, the GS-JR PRO is built to win Junior ski races. This FIS compliant Giant Slalom ski is super stable, fast, quick to accelerate, and 100% no-compromise: It's identically constructed as our GS World Cup skis, using the exact same high-end materials and the same Race Room tuning that helped Marcel win 31 GS World Cup races, 6 GS globes, and 2 GS gold medals. At 154 cm it is just shorter → ideal for up-and-coming U14 and U16 racers, who take their skiing as seriously as the world's best athletes. Welcome to a new generation of skis for a new generation of skiers.

FIS RACE SKIS

“You can be the best skier in the world, but if you don’t have the best material, you’re never going to win,” Marcel Hirscher once said. We want you to win. We want you to go as fast as you can. And we want you to be able to push your limits and break new ground on the racecourse. Fueled by 67 World Cup victories, 12 small crystal globes, 8 overall World Cup wins, 7 World Champs and 2 Olympic gold medals, Marcel Hirscher has developed a range of FIS compliant race skis that could be game changers in your career. Built with his unparalleled experience, know-how, skills and tireless strive for perfection, our World Cup skis are handcrafted and tuned with the same Race Room finish that used to get Marcel Hirscher to the top of the podium. So even if you don’t qualify for Sölden or Schladming any time soon, you will experience World Cup performance every time you take your skis to the racecourse.

SL WORLD CUP

The SL WORLD CUP is a premium FIS compliant Slalom ski developed and approved by Marcel Hirscher, winner of 32 Slalom World Cup races, 6 Slalom globes, and 3 Slalom gold medals. Made for the tightest lines and fastest times, it delivers explosive power out of Slalom turns, super quick edge-to-edge agility as well as insane edge grip and stability on the most challenging racecourses. It features our special torsion box sandwich construction with an ash/poplar wood core reinforced by double Titanal and Carbon layers. Add to that full ABS sidewalls, prepreg composite layers, race edges, a P-Tex race base, a genuine Race Room finish (and a few other magic ingredients we won't tell you about) and you get a superior Slalom ski that will help you chase that hundredth of a second on race day.

GS WORLD CUP

Developed and approved by none less than Marcel Hirscher, the GS WORLD CUP is ready to dominate Giant Slalom races at the highest level. Infused with 31 GS World Cup victories, 6 GS globes, and 2 GS gold medals, this premium FIS compliant GS ski allows you to nail your winning line, no matter the course and conditions. It features an ash/poplar wood core with double Titanal and Carbon layers, creating rock-solid stability and powerful acceleration out of every turn. Full-length ABS sidewalls and race edges provide incredible edge hold; while a P-Tex race base combined with Marcel's genuine Race Room finish (plus a few other magic ingredients he rather keeps to himself) will keep your time in the green when you cross the finish line.

— PRO SKIS

When Marcel Hirscher takes it easy on a groomer day, he takes his Pro skis out. But hey, don't be fooled by Marcel's definition of "easy" – these are full-on high-performance skis made for charging on-piste or ripping around the gates. They are just a bit easier to handle and, as Marcel says, even more fun to ski than our original range of FIS skis. In terms of construction and materials they are complete replicas of our GS World Cup skis, built with the exact same state-of-the-art technology and attention to detail. However, as they are not restricted by FIS rules, we've given them a wider geometry, with slightly more width underfoot, on tip and tail as well as a bit more sidecut. What that means for you? A tighter turn radius and better skiability. Whether you're an accomplished athlete like Marcel or a committed skier in search of that perfect hardpack line, these are your go-to skis for carving up the frontside all day long.

PRO SERIES

The PRO SERIES has everything you need to bring out the racer in you: precise edge grip, great stability, powerful acceleration, and top speed to rip the turns on-piste or between the gates. This premium high-performance ski is constructed and handmade in Austria from the same first-class materials as our World Cup skis. The only difference: It comes with a wider geometry and a smaller 18 m radius (at 164 cm), making it suitable and fun to ski for pros obsessing over hundredths of a second and ambitious piste skiers alike. And we can ensure you it has passed the hardest test of all: Marcel Hirscher developed and personally approved the PRO SERIES and made sure it got a professional manual Race Room tuning so you can ski your best from start to finish.

PRO RS

The PRO RS is as close as you'll get to Marcel Hirscher-approved World Cup performance without having to strap FIS compliant skis on your feet. This high-performance ski is a race machine ready to rock GS courses and rip outside the gates at high speed. It comes with the exact same construction and first-class materials as our original World Cup skis but features a tighter 25m turn radius, making it easier to carve a perfect arc on hardpack snow and icy runs. Providing incredible edge hold, rock-solid stability, and powerful acceleration out of every turn, this premium ski features full ABS sidewalls, race edges, and a P-Tex race base including Marcel's genuine Race Room finish, so pros and ambitious piste skiers can ski their best - from start to finish.

H-POWER SKI

Even for a skier as competitive as Marcel Hirscher, skiing is not just about winning - it is, first and foremost, about fun. At VAN DEER-Red Bull Sports, we believe that outstanding skis don't need to be tough to ski on; they can be fun and accessible for anyone ready to take their skiing to the next level. That's why Marcel created H-POWER, your gateway into his world of skiing. It's an intuitive performance piste ski with World Cup roots, infused with a good deal of ease. Featuring a similar construction, waist width, and radius as the original SL WC line but slightly longer and with a shallower sidecut, it's a confidence-inspiring carving ski for ripping up groomed terrain and laying down perfect slalom type turns into the corduroy.

H-POWER

The H-POWER is a Marcel-approved performance piste ski that elevates your game when conditions are groomed, firm and fast. Packed with World Cup tech and a good dose of fun, it's a confidence-boosting carver that is not demanding to handle yet grips and rips like a truebred race ski. Designed for snappy, short slalom-style turns and engineered for rock-solid edge hold, the H-POWER will make you feel like you're a World Cup star on hardpack early morning laps. It comes with a racy 67mm waist for great agility and maneuverability, and, compared to the original SL WC model, features a bit less sidecut and some added length for a more stable ride. Two layers of Titanal in combination with an ash/poplar wood core ensure Hirscher-like power transmission. Welcome to VAN DEER-Red Bull Sports' world of skiing!

ALL MOUNTAIN SKIS

There's a lot of talk about that one-ski-quiver. When Marcel stopped racing, he was curious whether it was possible to develop a do-it-all ski that perfectly works the vast majority of the season, no matter the conditions or terrain. His idea was a high-end all-mountain ski that deserves to be called that way. A ski that embodies the essence of skiing because it rips in all parts of the mountain and on any snow – boilerplate, crisp corduroy, freshies on or o-trail, crud, chalk, corn ... you name it. Guess what? Marcel and his team nailed it with the VAN DEER-Red Bull Sports ALL MOUNTAIN. Unlike other skis in this category, this is a true all-mountain killer with a healthy dose of World Cup tech so you can send it both on the groomers and in the sidecountry. So wherever you're located – east or west, north or south, you're all set up to make every day count.

ALL MOUNTAIN 78

The ALL MOUNTAIN 78 is an all-mountain killer ski that truly lives up to its name. Made to rip on all parts of the mountain – on and off-piste – it's a no brainer almost any day of the season. With Marcel's signature on it, it comes as no surprise that this ski offers more hardpack performance than pretty much any other model in its class, crushing the groomers like a race ski, even in extremely firm and icy conditions. At the same time it's plenty but not too light, very nimble and extremely versatile so that you won't have to think twice about heading sidecountry when those freshies are calling. Providing rock-solid stability and edge hold through every turn, the ALL MOUNTAIN 78 is powered by a poplar woodcore with two Titanal layers, full ABS sidewalls, race edges, a P-TEX race base, and a genuine Race Room finish. 100% Marcel-approved, this might just be your one-ski quiver.

FREERIDE SKIS

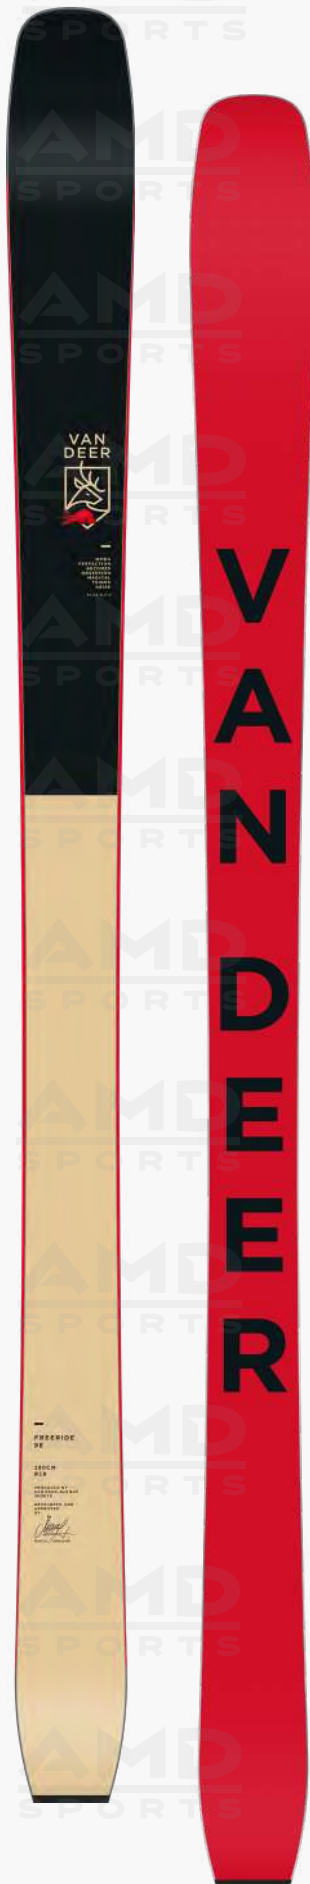

Marcel Hirscher is known as one of the most successful ski racers ever. But he's also regarded as 'the greatest alpine skier of our time' and rightly so because limiting his skiing to gates and racecourses simply wouldn't do him justice. He's an incredibly complete skier, ripping it on the hardest of hard-pack as well as in the deepest of powder, and anything in between. Lately, he has been doing a lot of big mountain skiing, including his much acclaimed 'lap of honor' at the Freeride World Tour in Fieberbrunn. While in the white room, his brain is constantly buzzing, so it comes as no surprise that Marcel has created his own line of freeride skis. Designed to forge through whatever the mountain throws at you, these skis are your ticket to ride on deep storm days or whenever you feel like exploring far-out zones. They come in different widths and are versatile enough to handle anything from pillows stacked with fresh powder, to crud and groomers, so you can have a sick day, no matter the terrain or conditions.

FREERIDE 98

The FREERIDE 98 is an all-terrain freeride ski that has got range. Ready to take you from corduroy to deep in the backcountry, this is one of Marcel Hirscher's favorite picks. At 98 mm underfoot it's sized for maximum versatility, with an impressive yet playful performance in a variety of conditions: floaty in powder, grippy on hardpacked snow, very maneuverable in the trees, and stable at speeds. Featuring a good amount of tip & tail rocker for that surfy feel on storm days, the FREERIDE 98 is built on the same construction as its bigger brother, the FREERIDE 108, including a poplar wood core, double Titanal and Carbon laminates, full ABS sidewalls, race edges, and a P-Tex race base. Add to that Marcel's high-end Race Room finish and some other magic touches he won't talk about and this is your ski for inbounds hike-to terrain as well as deeper days out-of-bounds.

FREERIDE 108

The FREERIDE 108 is a fat freeride ski for big mountain skiers ready to drop big lines in any terrain. At 108 mm underfoot it's the widest and one of the most exciting skis Marcel Hirscher has developed: easy to control, light in the air, stable at speeds, and extremely floaty in powder - this is your buddy for ripping the entire mountain top to bottom. It delivers awesome floatation for surfing and smearing turns in the deepest of snow, allows you to charge through chop, and is very maneuverable, responsive, and capable of handling harder snow too. It features a surfy tip & tail rocker and is constructed according to the same 'winning line' recipe as the rest of our range, including: a poplar wood core reinforced by double Titanal and Carbon layers, full ABS sidewalls, race edges, a P-Tex race base, plus some undisclosed ingredients. And since Marcel wouldn't approve anything less than perfect, this fatty comes with a genuine Race Room finish, too. Ready for the next dump?

TOURING SKIS

While Marcel Hirscher has retired from World Cup racing, he certainly has not retired from skiing. His enthusiasm for the white stuff is still the same, but his approach is much more relaxed these days. He now spends most winter days exploring the backcountry, and ski touring in the mountains close to his home is especially high on his agenda. It's the ideal place to stock up on magic moments and to get inspired for some new touring skis - what else would you expect from a tinkerer like Marcel? Following countless hours of skinning up and laying down beautiful lines on the way down, Marcel has come up with a small but sweet lineup of Carbon-powered touring skis, including a super versatile all-round tourer and an ultra-light race touring ski. Whatever your mission may be in the backcountry, we've got you covered.

RACE TOUR 65

Featherlight, super skinny, ultra-fast - the RACE TOUR 65 is a thoroughbred race touring ski for speed tourers and ski mountaineers chasing personal bests. Merely weighing 760 grams, it's designed for ascending big vertical and covering long distances at maximum speed and with greatest efficiency. Of course, like the entire VAN DEER-Red Bull Sports range, this ski, too, is Marcel-approved, so it'll give you a competitive edge not just on the up, but also on the down. It's purpose-built with a sandwich torsion frame and features an ultra-light Paulownia woodcore with Titanal and Carbon laminates to deliver optimal torsion and flexural rigidity on fast descents. Skimo athletes - this is your ticket to fly.

FREE TOUR 88

The FREE TOUR 88 is an incredibly lightweight, super versatile Carbon-powered ski made for alpine touring. At 88 mm underfoot it's well-balanced between uphill ease and downhill performance. Thanks to its ultralight Paulownia wood core reinforced with Titanal and Carbon layers it weighs just 950 to 1.150 grams, allowing you to climb efficiently. It's still extremely smooth, grippy, and stable on the descent and floaty in powder. That's kind of unique for an all-round touring ski of that weight, but not too surprising, considering that the FREE TOUR 88 has been developed and approved by Marcel Hirscher, who would never compromise on skiability. Whether you're tackling an alpine crossing or the local hill, this touring ski is ready for some serious human-powered vertical meters.

BINDINGS AND PLATES

For the best in performance, precision and safety, VAN DEER-Red Bull Sports has partnered with LOOK, one of the leading ski binding manufacturers on the market. Being in the ski business since 1951, LOOK offers a range of high-end ski bindings that have been developed in collaboration with and tried, tested, and proven by some of the best athletes in the World Cup.

LOOK SPX 10 GW

The LOOK SPX 10 GW is a high-performance ski binding for young aggressive racers. Featuring the strongest retention and longest elastic travel on the market, this junior race binding delivers instant power transmission and precise control with superior shock absorption to reduce unwanted pre-release. For the most effective protection in the event of a fall the toe allows upward release independent of the heel.

This premium ski binding is compatible with the LOOK R21 and R22 race plate and with traditional Alpine (ISO 5355) as well as GripWalk® boots.

RANGE

	DIN	BRAKES	WEIGHT
SPX 10 GW, HOT RED V23BN004	3 - 10	<73mm	900g ⁽²⁾

⁽²⁾Weight per binding.

LOOK x VDRBS SPX 12 GW

The LOOK SPX 12 GW is a competition-level race binding designed for committed alpine ski racers in need of a lower DIN range. The strongest retention and longest elastic travel on the market deliver instant power transfer and precise control with superior shock absorption for reduced pre-release. Thanks to a smaller binding attachment area and semi-suspended heel piece, it provides enhanced control over the ski's flex during turns while retaining maximum precision.

This premium ski binding is compatible with the LOOK R22 and R21 race plate and with traditional Alpine (ISO 5355) as well as GripWalk® boots.

RANGE

	DIN	BRAKES	WEIGHT
SPX 12 GW, GRAY V23BN017	31/2 - 12	<80mm	1.180g ⁽²⁾
SPX 12 GW, KHAKI V23BN003	31/2 - 12	<80mm	1.180g ⁽²⁾

⁽²⁾Weight per binding.

LOOK x VDRBS SPX 15 ROCKERACE

The LOOK SPX 15 ROCKERACE is an elite-level competition race binding designed for committed alpine ski racers. Featuring the strongest retention and longest elastic travel on the market, it delivers instant power transfer and precise control with superior shock absorption for reduced pre-release. Its short mounting zone and semi-suspended heel enhance the ski's flex for maximum response and control.

This premium ski binding is compatible with the LOOK R22 race plate and with traditional Alpine (ISO 5355) boots.

RANGE

	DIN	BRAKES	WEIGHT
SPX 15 ROCKERACE, GRAY V23BN016	7 - 15	<80mm	1.295g ⁽²⁾
SPX 15 ROCKERACE, KHAKI V23BN002	7 - 15	<80mm	1.295g ⁽²⁾

⁽²⁾weight per binding.

LOOK PX 18 WC ROCKERACE

World Cup tested and developed in collaboration with top athletes, the PX 18 WC ROCKERACE is the Formula One of ski race bindings.

With the strongest retention and longest elastic travel on the market, this elite-level binding delivers instant power transmission and precise control with superior shock absorption for reduced pre-release. Its short mounting zone and semi-suspended heel enhance ski flex for maximum response and control.

It's only compatible R22 race plate equipped skis and ISO 5355 A boots.

RANGE

	DIN	BRAKES	WEIGHT
PX 18 WC ROCKERACE, BLACK V23BN001	10 - 18	<80mm	1.635g ⁽²⁾

⁽²⁾weight per binding.

LOOK R21 PRO RACE PLATE

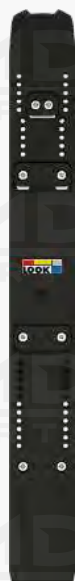

The LOOK R21 PRO is a two-piece lifter plate that adapts perfectly to young athletes' body shapes and ski lengths.

RANGE

FITTING BINDINGS

LOOK PIVOT 12 GW

The all-mountain Pivot ski binding sets the standard for control and release for the world's most dedicated skiers. The binding's Full Action toe piece and unique "turntable" heel design offer expert freeskiers a responsive connection between boot and ski for instant power transmission and precise ski control. It features powerful shock absorption and travel with confident retention and release for aggressive skiing.

It's compatible with all traditional Alpine (ISO 5355) and GripWalk® boot soles.

RANGE

	DIN	BRAKES	WEIGHT
PIVOT 12 GW BLACK, B95 V23BN013	4 - 12	75 - 98mm	1.105g ⁽²⁾

⁽²⁾Weight per binding.

LOOK PIVOT 15 GW

Featuring a 15 DIN rating and raw, unpainted finish, the binding's durable aluminum toe piece and unique "turntable" heel design offer expert freeskiers a responsive connection between boot and ski for instant power transmission and precise ski control. It features powerful shock absorption and travel with confident retention and release for aggressive skiing.

It's compatible with all traditional Alpine (ISO 5355) and GripWalk® boot soles.

RANGE

	DIN	BRAKES	WEIGHT

⁽²⁾Weight per binding.

RENTAL BINDING SYSTEMS

LOOK SPX 12 RACE METRIX RENTAL ONLY

The RACE METRIX system allows you to test or rent racing skis without any concession to performance and skiability. It is equipped with the Full Action reinforced stop and the SPX heel piece. The SPX12 RACE METRIX GripWalk® can only be mounted on skis with R22 interface and has a range of adjustment to fit boot lengths between 262 and 362 mm. This system is compatible with all adult boots ISO 5355 A and GripWalk® ISO 23223 A.

RANGE

	DIN	BRAKES	WEIGHT
SPX 12 GW RACE METRIX, BLACK V23BN005	3.5 - 12	<80mm	1.635g ⁽²⁾

⁽²⁾weight per binding.

LOOK SPX 12 METRIX RENTAL ONLY

You like skiing bottomless powder and kneeling down to pet cute dogs, so keep your knees sweet this season and click into the Look SPX 12 GW Ski Bindings. Offering 27 mm of vertical elasticity in the heel and 45 mm of lateral elasticity in the toe, the GripWalk compatible SPX 12's offer superior shock absorption and reliable retention to keep you in when you're trying to stomp the landing, not pop out of your ski.

RANGE

	DIN	BRAKES	WEIGHT
SPX 12 GW METRIX BLACK, B80 V23BN014	3.5 - 12	<80mm	1.635g ⁽²⁾

SKI BOOTS

LANGE x VDRBS RS 130 LV

Power and Precision. The RS 130 LV is the result of deep understanding foot mechanics, fit, and ski boot behavior. Featuring Lange's new, race-developed Dual Core construction, RS supplies incredible energy and flex control, becoming a natural extension of your body for total control through the turn.

The anatomic shell design integrates perfectly with our Dual 3D World Cup Race liner, delivering unparalleled comfort, precision, and power transmission. Be One with your boots, Be One with your goal.

TECHNICAL DETAILS

- Shell and Cuff Material: Polyether Dual Core
- Shell Bootboard Material: Hard Polyurethane Foam
- Buckles: Lange Alu Race Articulating Micro
- Liner: Lange World Cup Liner (adjustable tongue)

TOURING SKINS

Our obsession for perfection does not end with skis, boots, and bindings. That's why we choose our partners for gear and accessories very carefully. Offering high-performance climbing skins to go with our freeride and touring skis, VAN DEER-Red Bull Sports has partnered with KOHLA, an industry-leading Tyrolean manufacturer of mountaineering gear. KOHLA climbing skins are developed, tested, and produced in Austria according to the highest production standards. So they fit our touring and freeride skis just perfectly, in every respect.

RACE TOUR 65 SPEED SKIN

Not only extremely fast, but also highly precise: The laser-cut edges of the RACE also promote the gliding properties of the skin and prevent unwanted braking. The "RACE Loop" front tensioning system is not only light, but also easy to adjust and therefore individually adaptable for use on skis. With RACE you can now reach your goal even faster!

TECHNICAL DETAILS

- Waterproof Skin Construction
- High-Precision Laser Cutting
- Speed Webbing and Wax Finish
- Finest Special Mohair
- Newly developed Smart Glue
- Superlight Tip Attachment
- Developed with World Cup athletes

RACE TOUR 65 SPEED SKIN, 161cm V23ZU001	Red Black	62mm	100% Mohair

— FREE TOUR 88 SKIN

The Tour 88 Mohair Mix Skin is a high-performance climbing skin that perfectly matches our FREE TOUR 88 touring ski. It's pre-cut and does not require any trimming. Built for piste, powder, and anything in between, this is your all-purpose, go-anywhere skin. It is made from robust Mixmohair (65 % mohair, 35 % nylon) for a strong grip, smooth glide, and extreme durability and features KOHLA's new water-repellent Fiberseal Technology to keep your skin dry. "Smart Glue", a state-of-the-art adhesive, makes it easy to handle and remove so you can do more laps and cover more terrain without having to worry.

— TECHNICAL DETAILS

- Specific solvent-free Hot-Melt glue
- Application range up to -30°C
- Changeable tip attachment
- Mixmohair (65% mohair/35% nylon)
- Exclusive speed webbing
- Water-resistant fluorocarbon impregnation
- Solvent-free coating
- Polyester-cotton back layer system
- PA and TPE plastic parts
- Inclusive T-Bar 85 (changeable)
- K-Clip spring back attachment
- Tear-resistant end handle (max. 120 newton)

SKI POLES

For us, poles are more than accessories. They're an essential piece of equipment, so we've teamed up with Austrian manufacturer Komperdell to create high-end ski poles that are just as premium as our skis.

RACE CARBON POLE

The RACE CARBON is a premium racing pole designed for chasing that one hundredth of a second. It's multi-discipline, superfast and super strong. Its lightweight and extremely robust shaft is made from high-grade carbon for optimum swing weight. An ergonomic non-slip race rubber handle and race strap with smart strap fastening ensure a secure grip and hold through every turn and make handling very easy. The race-specific mini race basket is ideal for racers of any level, while the Tungsten Carbide Flex Tip provides superior grip on hardpack and ice.

TECHNICAL DETAILS

- Race Rubber Handle (non-slip and stable)
- Race Strap (secure hold and easy entry/exit)
- Carbon Fiber Composite (Ø 13/9mm)
- Mini Race Basket
- Tungsten/Carbide Flex Tip

— PISTE CARBON POLE

The PISTE CARBON is a premium ski pole for ambitious skiers keen to crush the groomers. Its lightweight yet very robust shaft is made of high-quality carbon for optimal swing weight. The pole's 2-component non-slip rubber handle secures an extremely comfortable, grippy feeling, while the easy-to-handle click-in strap ensures excellent hold through every turn. Thanks to the Tungsten Carbide Flex Tip you can count on maximum grip even in icy conditions, and the ultra-light mini baskets are ideal for hardpack skiing.

— TECHNICAL DETAILS

- 2-Component Rubber Handle (non-slip and stable)
- Click-In Strap (secure hold and easy entry/exit)
- Carbon Fiber Composite (Ø 13/9mm)
- Tungsten/Carbide Flex Tip
- Mini UL Basket

— FREE TOUR ALU ADJUSTABLE POLE

The FREE TOUR ALU ADJUSTABLE POLE is a lightweight, robust telescopic freeride and ski touring pole. It's adjustable via the Aluminium Powerlock, allowing for different pole lengths based on terrain and situation. Its comfortable 2-component rubber grip and the practical Ergo Click-In Strap provide a reliable grip, both uphill and downhill. Thanks to the non-slip rubber thermal grip zone you can easily and comfortably grip the pole lower through traverses or steep terrain without getting cold hands. Wide powder baskets prevent sinking in, and the robust Carbide Flex Tip ensures superior grip in pretty much any terrain.

— TECHNICAL DETAILS

- 2-Component Rubber Handle (non-slip and stable)
- Ergo Click-In Strap (secure hold and easy entry/exit)
- Anti-Slip Rubber Thermal Grip Zone
- Aluminium 7075 T6 (Ø18/16mm)
- Aluminum Powerlock 3.0
- Carbide Flex Tip
- Powder Baskets

RACE STRAP

Our RACE STRAP is a small but essential piece of gear for skiers. This Velcro skifix securely holds your skis together, keeps them in place and protects your skis' edges and bases from damage, wherever you go.

RANGE

RACE STRAP
V23ZU011

FREERIDE STRAP

When you're out freeriding and ski touring, it's always a good idea to take our FREERIDE STRAP along. This durable quick-closing rubber strap securely holds your skis together and allows you to lash your planks or other bulky items to your backpack. An essential piece of gear for out-of-bounds skiing, touring, and bootpacking.

RANGE

FREERIDE STRAP
V23ZU012

— FACTORY RACING SKIBAGS

If you care about your skis, you better care about how to get them safely to the hill and back home, too. We've got you covered with our FACTORY RACING SKIBAG that keeps your favorite skis protected wherever you're headed ... in the car, on the plane etc. This high-quality padded premium bag for up to three pairs of skis comes in our exclusive Factory Racing Design for a good reason: it's the skibag our World Cup athletes use all winter long when travelling between Adelboden, Kitzbühel, Schladming and so on - season after season. It's extremely hard-wearing and water-resistant outside and easy to clean inside. The external compression straps and sturdy buckles allow you to pack your skis tight so there's no damage to edges and bases. The bag is available in the following lengths: 185cm for your slalom skis, 215cm for your GS skis, and 240cm to accommodate SG and DH skis.

— RANGE
